

## DATA MANAGEMENT WORKSHOP FOR HEMATOPOIETIC STEM CELL TRANSPLANTATION (HSCT) CENTERS

7-8 NOVEMBER 2014  
CONCORDE HOTEL (LES BERGES DU LAC)  
TUNIS, TUNISIA

The First EMBMT Data Management Course will be conducted in collaboration with CIBMTR and EBMT. The objective of the workshop is to provide platform to present the latest development in the data management and focus on establishing effective disease specific Hematopoietic Stem Cell Transplantation data bases.

EMBMT will sponsor up to 2 candidates from every transplant center in the EMRO region to attend the workshop. The course will be limited to 30 participants who will be fully sponsored to attend. The Program Directors will select the qualified staff to represent their institutions in the workshop. The participants will include data professionals, clinical research associates and physicians with experience in data management. The workshop highlight will include data management, data reporting, data quality, and data reporting from EMBMT, EBMT and CIBMTR.

Course will encompass the following topics:

- HSCT Databases
- Data Management Systems
- Protocols and Consent Forms
- Unique ID Assignment & Protected Health Information (PHI), Data Quality/monitoring
- Data Audit/Quality Assurance/CPI
- CTC/Toxicity Evaluation
- Investigational Drug Accountability
